EC135	T1, T2, T2+, T3, P1, P2, P2+, P3, 635 T1, 635 T2+, 635 T3, 635 P2+, 635 P3	

The purpose of this revision is to include all aircraft for which this booklet is available.

Airbus Helicopters would like to inform you of the recent publication of the H175 Ground Rescue Booklet for firefighters and rescue teams.

It joins the already available documents for H130, H135, EC145, H145, H155 and H225 helicopters and can be downloaded free of charge from Keycopter via eTechpub. A copy is also available [on the Airbus Helicopters website](http://www.airbushelicopters.com/techpub/), in the Safety subsection.

A Ground Rescue Booklet provides general and safety-related information concerning an aircraft and shall only be considered as a support for users to prepare their own documentation. The booklets will not systematically be updated in line with the aircraft modification process. Depending on the country and the modification status of the helicopter, systems may differ in location.

Wide-spread dissemination to firefighters and rescue teams around the world is strongly encouraged.
